# Observing

## Activities

- What are people doing?

## Environment

- How are people using the environment? What's the role of the environment?

## Interactions

- What are the basic interactions occurring for people to reach goals? Do you see any routines? Do you observe special interactions between people? Between people and objects?

## Objects

- What's there being used or not used? Describe engagement with objects.

## Users

- Who are the users? What are their roles? Look for extreme users.
